

Finding a Provider

Using in-network providers and facilities gets you the most coverage for healthcare services and saves you money.

Utah Provider Search

To find an in-network provider in Utah, follow these simple steps.

- 1 **Go to emihealth.com**
Click on **Find a Provider** along the upper part of the home page.
- 2 **Select the type of provider**
Select medical, dental, or vision.
- 3 **Enter your plan name (Care Plus-found on your ID card), state, and zip code**
You can also select **"Use My Location"**. This feature will automatically populate the state and zip code where you are searching.
- 4 **Click "Search"**
You will get a list of results on the next page.
- 5 **Filter and sort your results**
Now you can filter your results for locations, specialties, facilities, languages, and more. Click **"Search"** each time you adjust a filter to refresh the results list.

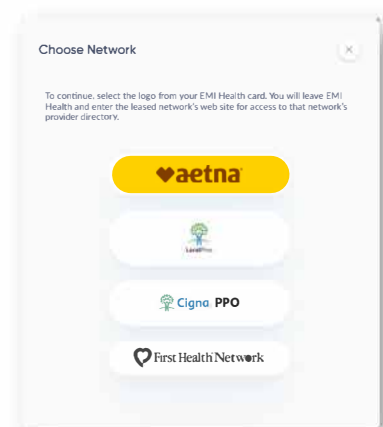

That's all there is to it!

You will see a list of participating providers along with contact information, address, and the ability to map the location of their offices. You can also download the results as a PDF to keep or take with you.

Traveling outside Utah?

You are covered by a national network. So if you are traveling, follow the same steps as before, and input the new location. Depending on the state you select, you may see this pop up. Outside of Utah, EMI Health has partnered with larger provider networks to make sure our members have plenty of in-network providers nearby. If you see one of the logos in this pop up on your EMI Health member ID card (**Aetna**), select the one you see and you will be redirected to their Provider Search tool.

Questions?

As always, we are here to help. **Call customer service at 800-662-5851**

Please Note: Not all plans have participating provider benefits outside of your state of residence. To confirm your benefits, or if you have any questions, please contact the EMI Health customer service team.
